

Matias Martello

SOFTWARE ENGINEER

Buenos Aires, Argentina matias.martello@gmail.com

PROFILE

Full Stack professional with experience in architecture, technical leadership, and digital product development. Specialized in understanding complex problems and turning them into efficient, scalable, user-centered solutions.

STRENGTHS

FRONTEND

React TypeScript Next.js
Astro React Native Expo
Cypress

BACKEND

Go Node.js NestJS
C# / .NET SQL NoSQL
Cache DB Graph DBs
Apache Kafka RabbitMQ

INFRASTRUCTURE

CI/CD Docker Jenkins
Nomad Grafana Sentry
Observability Terraform AWS

SOFT SKILLS

Technical leadership ·
Cross-functional
collaboration · Problem
solving · Clear
communication · Ownership
· Stakeholder alignment

PROFESSIONAL EXPERIENCE

Software Engineer

2023 — 2026

Stonebranch · Remote

Developed an MFT solution, creating focused end-user tools that reduce the complexity of the core solution.

- Partnered with the backend team on the technical and functional definition of new features.
- Built experiences for configuring and maintaining nodes.
- Created tools to manage communication channels and transfers.

Software Engineering · MFT · Cross-functional collaboration

Full Stack · Personal Project

2026 — Present

Playpeak · Argentina

Continuous-learning project comprising three interconnected sports products integrated through microservices.

- Own the architecture and end-to-end delivery across web, mobile, backend services, and data.
- Built CI pipelines with automated tests, quality gates, and security checks to improve release reliability and reduce the attack surface.
- Implemented centralized observability and monitoring assisted by state-of-the-art AI models.

Microservices · AI · CI/CD · Observability

Frontend Lead

2022 — 2023

GlobalLogic · Remote

Led a frontend team working on an advanced architecture for a large-scale payments client.

- Implemented microfrontends to split work across development teams.
- Enabled decoupled feature deployments aligned with business requirements.

Microfrontends · Payments · Leadership

PROFESSIONAL EXPERIENCE · CONTINUED

Full Stack Developer Poder Judicial · Argentina Developed a high-security application for entering and managing judicial cases, with access to related information. - Built secure workflows for case files and sensitive data. - Modeled related information to improve case lookup. Full Stack · Security · Case management	2015 — 2022
Full Stack Developer M&G Consultores · Argentina Created and supported multiple C# MVC applications in direct contact with end customers. - Gathered, understood, and refined requirements. - Maintained and evolved MVC applications. C# · MVC · Client-facing	2014 — 2015
Full Stack Developer Accenture · Argentina Tested and developed MVC-pattern applications, with a focus on performance and relational databases. - Developed with C#, Windows Forms, ASP.NET, PHP, HTML, and JavaScript. - Optimized SQL queries and managed relational databases. C# · ASP.NET · SQL	2012 — 2014

EDUCATION

Systems Engineering UTN FRBA Final year: capstone project in progress.
Electronics Technician PIO IX Secondary School · 2014
Continuous Learning Online courses since 2014: AI, networking, CI/CD, observability, profiling, and deployment techniques.

CERTIFICATIONS

Security+ In progress
PenTest+ In progress

SELECTED PROJECTS

Playpeak · Learning project Ecosystem of three sports products integrated through microservices, with AI-assisted monitoring and CI quality and security gates. React Native · React · Go · PostgreSQL · Microservices · AI · CI/CD
Coiron MPF · Product Judicial case-management software that interconnects people and case elements through a graph database. C# · React · SQL · Neo4j · Elasticsearch
MFT Managed File Transfer · SaaS Enterprise file-transfer system with encryption and auditing. Go · Polyglot persistence · React
Card Payment · Frontend Bank-card payment processing system. React · TypeScript · Tailwind · Cypress
