## METHODOLOGIES

Agile · Software architecture · Microfrontends · API design · Continuous integration and deployment · Technical leadership

## PROFESSIONAL EXPERIENCE

### Full Stack Founder

2026 — Present

#### Playpeak · Argentina

Founder and developer of a sports management application that connects players of the same sport and streamlines court management.

- End-to-end product design and development.
- Features for connecting players and managing court bookings.

Full Stack · Product · Sport Tech

### Frontend Lead

2023 — 2026

#### Stonebranch · Remote

Led a frontend team for an MFT solution, creating focused end-user tools that reduce the complexity of the core solution.

- Built experiences for configuring and maintaining nodes.
- Created tools to manage communication channels and transfers.

Frontend · MFT · Leadership

### Frontend Lead

2022 — 2023

#### GlobalLogic · Remote

Led a frontend team working on an advanced architecture for a large-scale payments client.

- Implemented microfrontends to split work across development teams.
- Enabled decoupled feature deployments aligned with business requirements.

Microfrontends · Payments · Leadership

## PROFESSIONAL EXPERIENCE · CONTINUED

### Full Stack Developer

2015 — 2022

#### Poder Judicial · Argentina

Developed a high-security application for entering and managing judicial cases, with access to related information.

- Built secure workflows for case files and sensitive data.
- Modeled related information to improve case lookup.

Full Stack · Security · Case management

### Full Stack Developer

2014 — 2015

#### M&G Consultores · Argentina

Created and supported multiple C# MVC applications in direct contact with end customers.

- Gathered, understood, and refined requirements.
- Maintained and evolved MVC applications.

C# · MVC · Client-facing

### Full Stack Developer

2012 — 2014

#### Accenture · Argentina

Tested and developed MVC-pattern applications, with a focus on performance and relational databases.

- Developed with C#, Windows Forms, ASP.NET, PHP, HTML, and JavaScript.
- Optimized SQL queries and managed relational databases.

C# · ASP.NET · SQL

## EDUCATION

### Systems Engineering

UTN FRBA · 2014 — 2022

### Electronics Technician

PIO IX Secondary School · 2014

### Continuous Learning

Online courses since 2014:  
AI, networking, CI/CD, observability, profiling, and deployment techniques.

## SELECTED PROJECTS

### Playpeak · Personal project

Web and mobile application for managing sports events.

React Native · React · Go · PostgreSQL

### Clubik · Personal project

Web application for booking and managing sports courts.

Astro · React · Go · PostgreSQL

### MFT Managed File Transfer · SaaS

Enterprise file-transfer system with encryption and auditing.

Go · Polyglot persistence · React

### Card Payment · Frontend

Bank-card payment processing system.

React · TypeScript · Tailwind · Cypress
